RAYMOND, ALBERTA, FRIDAY, NOV 5 1926

NO. 38

## Disastrous Fire Razes Local Business Section May Reach Quarter Million Damage

### Pres. H. B. Brown Resigns Position

Succeeded By A. E. Palmer

After five years in office as president of the Lethbridge stake of the L. D. S. Church, Elder Hugh B. Brown, Lethbridge barrister, was honorably released at the Sunday morning session of the conference held in the city Saturday and Sunday. He is succeeded by Elder A. E. Palmer of this city, who was unanimously sustained along with his counsellors, Elders George W. Green and P. D. Clarke.

The changes were made by President Rudger Clawson of the Council of Apostles, who with Apostle Orson F. Whitney, represented the general authorities of the church from Utah. Mr. Brown expects to leave Lethbridge around the first of the year for Logan, Utah, where he will take over one of the largest legal practices in that city. Arrangements for his admittance to the Utah state bar are now being made. The change in the presidency came as a distinct surprise to the conference and expressions of regret at the impending departure of a beloved church leader were registered.

The conference was one of the largest and most spirited in the history of the stake and the new president was installed with the full endorsement and confidence of the people. Pres. Palmer, while not exactly a "native son", was reared and to a large degree educated in Canada. He is the son of Mr. and Mrs. William Palmer of Raymond, and was educated in the public and high schools of that town, later taking his college work in the Utah Agriculture College at Logan, where he received his degree. After doing experimental work in Utah and Wyoming for the government he returned to Canada, becoming principal of the Knight Academy at Raymond, later entering the service of the Dominion government as assistant to the superintendent of the Lethbridge Experimental Station, a position he now holds. His counsellors are well known in the city. Mr. Green being an old time business man here, and Mr. Clarke one of the younger members of the local bar.—Herald.

### News Notes

Clifford Gough returned home last week from a two years mission spent in England.

Dick Woolf threshed 69000 bushels from 1300 acres. He had 200 acres which averaged 89 bushels to the acre.

The annual Thanksgiving dance will be held in the Opera House by the Women's Institute on Monday, November 8. The 5-piece Premier orchestra will be in attendance. Continuous dancing from 9 until 12. Admission \$1.00 a couple. Extra lady 25c.

Fire which damaged the local business section to the extent of perhaps a quarter of a million dollars broke out on Wednesday evening at about 7:30 p. m. Before it was noticed the interior of the Raymond Pharmacy was a mass of flames making entrance impossible. Nothing from this building was saved. The holocaust quickly spread to the hotel on one side and the Raymond Mercantile on the other. From the hotel the flames gapped a distance of 75 feet and consumed the sample room and Nebbs Cash and Carry Store despite the efforts of hundreds of men carrying buckets of water. The water power was practically shut off when burnt telephone wires severed connection from the pump to the power house.

However, the bucket brigade men were successful in saving the barber shop and adjoining buildings although the task seemed impossible. They were also effective in saving the lumber yard across the street from the Mercantile.

Buildings razed to the ground are:

The Raymond Mercantile, one of Southern Alberta's finest stores carrying a stock of perhaps \$100,000. Insured Stock partly saved. Warehouse saved.

The Raymond Pharmacy. Nothing saved. Partly insured. Mr. Cope is the heaviest loser proportionately. He will probably re-open in the old post office.

The Raymond hotel building owned by O. H. Snow. Equipment owned by C. W. Stone. Partly insured. Practically nothing saved.

The Sample Room. Vacant. Owned by C. M. McCarthy. Insured probably.

Nebbs Cash and Carry. Nothing saved. Insured.

Duffy the Tailor's Shop in hotel building. Effects removed.

Hotel restaurant. John King owner of equipment. Very little saved.

Heat was so intense that the windows of the new post office building were cracked. Occupants of this building were busy moving their possessions into the street. Equipment and stock were completely removed from the barber shop, American Cafe and Club Cafe with consequent heavy damage from rough handling and theft. A portion of the stock was also moved from Bennett and Company's store while the result of heroic efforts to save the barber shop were still in doubt.

The Lethbridge fire department arrived when all buildings were a fallen mass of ruins and flames, but prevented further spread of fire in case of a wind arising. Fortunately the night was calm. The Lethbridge brigade attached the pump to the swimming pool for water supply, as the mains were empty. The town is still feeling the shortage of water for household purposes.

A disgusting feature of the night was the large amount of pilfering going on while others were making brave efforts to save what they could.

### News Notes

The Halloween dance given by the Gleaner Girls was well attended and a tremendous success. The dances given by the Gleaner Girls enjoy the same popularity as those given formerly by the business girls.

Novelties including balloons and spot dancing will be seen at the Thanksgiving dance to be given by the Women's Institute in the Opera House Monday, Nov. 8. The special 5-piece Premier Orchestra will attend. Continuous dancing from 9 to 12. Tickets \$1.00 a couple. Extra lady 25c. All are welcome.

The basement of the Mercantile store was a furnace which even the Lethbridge firemen were unable to extinguish. The Mercantile safe crashed down to the basement.

Reports as we go to press are to the effect that Mr. H. S. Allen will rebuild his fine store which has been the best local source of supply for many years.

## A National Literature

Greatness in a nation is to be found in something more than its might as a military or naval power, or in its vast possessions, its financial strength, its industrial development, its world-wide trade and commerce. True greatness is to be found in something more than even the health and physical fitness of its people, their educational attainments, their progressive-ness. Real greatness in a nation is to be found in things of a less tangible nature as revealed in the sentiment, the spirit, the inherent character of the people. In these are to be found the soul of a nation.

The nobility of character of a people, the soul of a nation is reflected in its art, its literature, whether of poetry or prose, its attitude towards religious observances, its sympathetic care of the unfortunate and afflicted.

The greatness of Britain is seen just as truly in the works of Shakespeare, Milton, Bunyan, Tennyson, Scott and Burns as it is in the deeds of Nelson, Drake, Wellington, Wolfe or Clive. Indeed, it has been such men as these in the first mentioned group who have been the inspiration of those in the second group. The poets and writers of Britain have interpreted the spirit of the races, have caught and aroused the finest and noblest instincts of their fellow men, have lifted high a banner under which Britons the world over have been inspired to serve with unselfish, undying devotion.

After the passage of centuries the greatness and glory of ancient Greece and Rome rests not upon the mighty achievements of their warriors but upon the beauty and power of their great authors, poets and artists. Their works still live and are an inspiration to the world, while the achievements of the warriors have long since crumbled into dust.

A young and still largely undeveloped country like Canada is naturally deeply concerned with material things. It is a country in the making, with a comparatively small population scattered over an immense territory. As a nation it has only recently passed the half century mark. Its history is yet to be made. The years that have passed have been creditable years, and in the future years of the Great War, Canada tested and proved the character of its people. Great material advancement has been recorded; progress is the national watchword.

But what of the Canada of the future? Are the Canadian people to be content with a form of national greatness based solely on increasing population, greater accumulations of wealth, an enrichment in things material, or do Canadians covet for their country a greatness which will include those other and less tangible, but infinitely less perishable, assets of a fine and lofty literature to guide and inspire generations yet unborn?

We believe Canadians do aspire to these higher things, and this belief is supported by a growing recognition on the part of press and people of the importance of encouraging the development of a strong and worthwhile Canadian literature. One concrete evidence of this is found in the increasing interest taken in Canadian books, Canadian poetry, Canadian art and music. Canadian authors' or Canadian book week has just been observed, and observed more generally than in any previous year. In a strictly material sense the surface idea may be to promote the sale of books by Canadian authors and publishers, but the real, the underlying idea is to thus provide encouragement to Canada's native born writers and poets, and to make possible a Canadian literature which will be a source of national pride, inspiration and strength.

Canada proved its greatness during the Great War not alone in the trenches, or at Vimy Ridge, or in the making of munitions, the raising of foodstuffs, the financing of huge undertakings, or in the self-sacrifice of its people. Of all the nations in the world, Canada at the same time prepared the finest pictorial record of the war by leading artists. This Dominion's War Memorial Pictures are without a peer in the world. It is a collection of unsurpassed historical value and beauty, not a glorification of war, but a pictorial history to acquaint future generations of Canadians with the heroism, the steadfastness, the self-sacrifice of our people, and to inspire them to cultivate and maintain those qualities and virtues which make for true national strength and greatness.

And it was a Canadian who produced the finest piece of poetry to have its inspiration in the Great War.—Colonel McCrae's "In Flanders Fields,"—a never dying message to the people of Canada to hold on high the torch of freedom and keep the faith for which their sons heroically fought and died.

Every Canadian home should have in it some of the best Canadian books, and the number should be added to yearly and to the extent that the finances of the home will permit. It is mere waste of time to deplore the prevalence of United States or other foreign books and magazines in Canada. There is one sure way to overcome this difficulty, and to promote the healthy growth of Canadian publications and encourage Canadian authors, and that is to commence the establishment of a small home library of Canadian books and to add to it as rapidly as possible. By so doing every Canadian can help in a very direct way in building up a strong and worthwhile Canadian literature which will prove to be a very real source of national strength.

## War On Rheumatism

International Society Has Been Organized to Combat It

Rheumatism costs the world as much as tuberculosis in loss of wages and labor, according to a report to the American Medical Association. The malady is much more important economically than is generally believed and an international society to combat it has been organized through the action of an association of physicians in the Netherlands.

This society is about to issue a world-wide rheumatism questionnaire to collect information about the causes, climatic, and social conditions and other factors that enter into the prevalence of the affection. These data will be used as a basis of scientific studies to determine better methods for its treatment and cure.

## Plan Unusual Flight

Round the World by Way of Poles is Latest Idea

A despatch to the Exchange Telegraph from Copenhagen says a round-the-world flight by way of the North and South Poles is being discussed among members of the Amundsen-Ellsworth Polar expedition, which flew across the North Pole last May, in the dirigible Norge.

This statement is credited to Dr. Finn Malmgren, meteorologist and oceanographer on the Polar flight and a close friend of Amundsen.

Dr. Malmgren believes the world flight feasible with an aeroplane having eight motors, but says the actual plans have not been formulated.

## Imitation Was Too Perfect

Louis Anderson, Kansas City, can whistle just like the siren on a police automobile, but he isn't bragging about it. Recently when he was practicing in a crowded street, a driver ahead of him got out of the way so quickly that he drove over a curbstone and smashed a store window. It cost Anderson \$10.

Minard's Liniment for chapped hands.

## Safety Of Railway Travel

Only Small Percentage of Accidents Occur on Canadian Roads

The safety of railway travel in Canada is again shown in a report issued by the Dominion Bureau of Statistics, covering the year 1925. For every billion miles travelled by passengers in that year only 1.7 were killed and 127.5 injured. In other words there were five passengers killed in train accidents in 1925 and 374 injured out of a total of 41,458,084 passengers carried a distance of 2,510,760,047 miles, or one passenger killed to every 834 billion carried and one injured out of every 110,000 carried.

## Linking Empire By Radio

Project Characterized as Dream Will Soon Be Accomplished

The long talked of linking up of the British Empire, a project that was only recently characterized as a dream, is expected to be accomplished within the next few months with the inauguration of four Imperial beam wireless stations in Great Britain. Two of these, at Bodmin and Bridgewater, will communicate with Canada and South Africa, respectively, and two others at Grimsby and Skegness, will span the seas to Australia and India.

## THE TRIALS OF MIDDLE-AGE

Much of the Suffering Women Endure Can Be Avoided

Every woman approaches middle-age with considerable anxiety, because she knows this is the time of her life when (stival ailments may be the first signs of trials and sufferings to come. She fears the headaches, backaches, lassitude and other distressing weaknesses that burden the life of so many women at this period.

Much of the anxiety and suffering that assail women approaching middle age can be avoided. This has been proved by thousands of happy, virile women who have relied at this time on the health-help given by Dr. Williams' Pink Pills. To the middle-aged woman the one thing necessary to carry her through her years of trial is rich, red blood. Because of their direct action on the blood, Dr. Williams' Pink Pills are the one remedy praised by women for women's needs. Among the thousands who have found benefit from this remedy is Mrs. Allan Wager, Echo Lake, Ont., who says:—"I was at a critical period in the lives of all women and was sick and miserable. I became so much run-down that I was unable to do my housework. The least exertion would cause my heart to flutter so violently that I would have to sit down. I had headaches and backaches, and was in a depressed condition. I saw Dr. Williams' Pink Pills recommended and decided to give them a trial. It was fortunate that I did so, for under the use of this medicine I was restored to good health and strength and feel like a new woman. I never neglect an opportunity to recommend this remedy to those who are run-down for I am very grateful for what the pills did for me."

For all ailments due to weak watery blood Dr. Williams' Pink Pills will be found a specific. You can get the pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Canadian Export Wheat

For the past seven crop years Canadian "export wheat" has totalled 975,000,000 bushels—of which 450 million bushels moved via Canadian ports, and 525 million bushels via U.S. routes.

There are some 320,000 superannuated officers and officials on the Japanese pension roll which amounts to about \$60,000,000 annually.

## WELL-MERITED SUCCESS

A distinguished citizen, honored politically and professionally, Dr. R. V. Pierce, whose picture appears above, made a success few have equalled. His pure herbal remedies which have stood the test for many years are still among the "best sellers." Dr. Pierce's Golden Medical Discovery is a blood medicine and stomach alterative. It clears the skin, beautifies it, increases the blood supply and the circulation, and pimples and eruptions vanish quickly. Beauty is but skin deep and good blood is beneath both. For your blood to be good, your stomach must be in condition, your liver active. This Discovery of Doctor Pierce's puts you in fine condition, with all the organs active. Ask your nearest druggist for Doctor Pierce's Golden Medical Discovery, in tablet or liquid form, or send 10 cents for trial package of tablets to Dr. Pierce's Laboratory in Bridgeburg, Ontario.

She Laughed!  
Thought It Was a Joke

Brooklyn. Mrs. K. Kummer writes. "Please take notice that I can write again. I have been troubled with what I thought rheumatism. I laughed when someone suggested that I try Carter's Little Liver Pills for I never thought that my trouble was constipation. About three months later I found out that I am a new person. I am thankful to you for the help your pills have done for me and my friends."

Carter's Little Liver Pills remove the constipation poison from the system. Not habit forming. Druggists 25 & 75c red packages.

## Makes Fun Of Food Faddists

Doctor Says More Nonsense Talked About Food Than Anything Else

Speaking in London at the annual dinner of the Institute of Certified Grocers, Sir James Cleithon-Browne said that in the present day food questions were in the ascendant as never before.

The fierce light that used to beat on the throne was now concentrated on the grocer's shop. It was scarcely possible to open a newspaper without finding some scare about food poisoning, food preservatives, food adulteration, with dietetic recommendations, which were sometimes simply foolish and sometimes mischievous.

Research work of the right kind was needed, but the deliverances of some so-called research workers must not be swallowed without asking questions. Research conclusions were often partial and provisional, and were sometimes published hurriedly and prematurely.

After all, the most trustworthy laboratory for food research was the human stomach, and its verdicts were not to be lightly set aside. Vitamins were always to the fore, but it was necessary to discriminate between vitamin science and vitamin fads.

There was no subject on which more nonsense was talked than that of food. Only the other day an eminent surgeon was inveighing against canned foods. But canned foods won the war.

Let them, as regards food, turn a deaf ear to the killjoys who would reduce them to meagre insipidity and to the faddists who would stuff them with all sorts of rubbish, and follow instead the dictates of common sense, well established tradition, and a healthy appetite.

As long as they had good, mixed, varied diet they need not bother their heads too much about vitamins.

## Freest People In World

Statement Made by Premier Taschereau About French Canadians

"Never, so long as there is a French Canada, will there be annexation of Canada by the United States," declared Premier Taschereau to the British United Press. "I don't believe there is any real movement in that direction. There are three million French-Canadians in Canada, and they are a very happy lot. They have much love for British institutions, where we have found liberty in everything we cherish. I believe we are the most free people in the world."

## Origin Of Old Saying

"No room to swing a cat," is an old naval phrase which does not refer to a feline. It was first applied to the confined space between decks on the old men-o'-war, which was so cramped that there was no room for the boson's mate to swing a cat-o'-nine-tails when administering floggings.

## British Jurist Writes Poetry

Lord Darling, the eminent British jurist who recently completed a tour of Canada, has a poem in the London Sunday Times entitled "At the Great Divide," dealing with the spot in the Rocky Mountains where a wooden arch marks the height of land.

The new patient in Ward B is very good-looking, said the nurse.

Yes, agreed the matron, but don't wash his face. He's had that done by four nurses this morning.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Sergeant (to rookie):—"If you have the east on your right hand and the west on your left hand what have you back of you?"

Rookie:—"My knapsack."

Keep Minard's Liniment in the house.

## Great Service To Mankind

If Scientists Can Discover Cause and Prevention of Common Colds

The ambition to "make colds as rare as smallpox" is said to be the moving force behind the proposal of the Chemical Foundation to organize and support extensive and intensive scientific research into the cause and prevention of common colds.

That this ailment yearly takes an enormous toll in discomfort and in loss of energy is well known. That it is one of the most difficult to guard against is also accepted. But many persons have long felt that medical and lay men alike have been too much inclined to regard colds as inevitable. The former have not devoted enough attention to prevention or cure and the latter have not realized the dangers and responsibilities of infection.

If, therefore, some organization of a scientific character can undertake an exhaustive study of colds in all their forms, and can find for them the preventives which, unless the lessons of checking much more dangerous diseases are to be ignored, must exist, it will be doing a great service to mankind. Even when colds are not followed by graver illnesses like influenza or pneumonia, they inevitably lower the individual's resistance to all types of sickness.—New York Times.

## Big Yields Per Acre

Reports of High Yields for Wheat in Alberta

Reports of high yields of wheat and other grains are being sent from different parts of Alberta to the provincial department of agriculture, from which the two following are taken: A. G. Walker, a farmer, who lives at Irma, Alberta, had 3 1/3 acres of well manured summerfallow land sown with Prelude wheat. Threshing it recently the machine tally recorded 312 bushels, or nearly 94 bushels per acre.

As an instance of what good cultivated and well irrigated land will do, a twenty-acre plot on the farm of J. E. Tennant can be pointed out which yielded 45 bushels to the acre. This will, it is reported, be duplicated many times over on good land in the irrigated districts of Southern Alberta as returns come in this fall.

## Did Not Spend Much

Boy Enjoyed Sights of New York For Four Dollars

From Jerusalem, Nathan Levy arrived in San Francisco, Cal., having made the journey alone and enjoyed the sights of New York at a total expense, in excess of his fare, of four dollars. Nathan's father is in San Francisco. Some time ago he sent Nathan steamer and rail tickets and a \$5 bill, and told him to come to San Francisco. Nathan started, tarried a while in New York, and on his arrival proudly displayed a single dollar, the remainder of his spending money.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

## Light And Sight

Glare More Harmful to Vision Than Insufficient Light

Investigation of the relation of light to the ability to see well was recently undertaken by the British government, resulting in the discovery that glare seriously interferes with good vision. The survey indicated that glare is even more harmful to the vision than insufficient illumination. Tests made in factories proved that increased illumination, with a minimum of glare, greatly increased the output of work.

## Punishment Fits the Crime

For every day they do not drink a gallon of water while they are in jail a day will be added to the sentence of four men sentenced by Mayor P. J. Groh of Dover, Ohio, for intoxication. The mayor said he was prescribing the "water cure" to break their liquor habit. The quartet got a minimum of ten days in jail.

## A SURE RELIEF FOR WOMEN'S DISORDERS 10 DAYS' TREATMENT FREE

Orange Lily is a certain relief for all disorders of women. It is applied locally and is absorbed into the suffering tissue. The dead waste matter in the congested region is expelled giving immediate mental and physical relief; the blood vessels and nerves are toned and strengthened; and the circulation is rendered normal. As this treatment is based on strictly scientific principles, and acts on the actual location of the disease it cannot help but do good in all forms of female troubles including delayed and painful menstruation, leucorrhea, falling of the womb, etc. Price \$2.00 per box, which is sufficient for one month's treatment. A Free Trial Treatment, enough for 10 days, worth 75c, will be sent free to any suffering woman who will send me her address.

Enclose 2 stamps and address, Mrs. Lydia W. Ladd, Dept. 31, Windsor, Ont. Sold by Leading Druggists Everywhere.

## A Double Escape

DOCTOR'S DAUGHTER'S STORY

Another Toronto home provides evidence of how a simple cut, scratch or bruise, may pave the way to deadly blood-poison, and how vital is the need for keeping Zam-Buk, always handy?

When called upon at 3, Business Avenue, Mrs. J. E. Zentley, daughter of the late Dr. Bevan, of St. David's, S. Wales, said:—"My boy Alfred scratched his leg with the brass tag of a shoe lace. A nasty poisoned sore developed and it defied all the usual ointments. Hearing splendid reports about Zam-Buk I decided to give it a trial. To my great relief, the balm soon caused healing to set in. All inflammation and poisonous matter was quickly removed by Zam-Buk, and it healed the sore without leaving a scar."

"Again when I fell over a steel fender and injured my knee badly, Zam-Buk alone saved me. My daughter, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus. But I again pinned my faith to Zam-Buk, and it cleansed and healed the wound." All druggists and stores sell Zam-Buk at fifty cents per box. Equally valuable for eczema, pimples, cuts, burns, etc.

## Has Amassed Fortune

Candy King of Melbourne, Australia, Is Worth Fifty Million

Australia has the world's candy king. His name is MacRobertson and he is said to be the richest man in the South seas, his fortune being placed close to \$50,000,000. He has seventeen large candy manufacturing plants and in his office there are models of all of them.

He never tires of studying his plants and planning ways and means to better the working conditions of his 2,500 employees. Their average wage is \$1,000 annually. For many years he has set aside a certain proportion of the profits from his business for charity and every organized body in Australia gets a share of it yearly.

## Will Become Memorial

Coach in Which Armistice Was Signed Is To Be Preserved

The famous railway coach in which the Armistice was signed in November, 1918, will shortly, thanks to the generosity of an unnamed American, become a permanent memorial at the "Armistice Crossroads" at Bethondes, where the historic act took place.

The interior of the coach will be restored as nearly as possible to its appearance at the time Marshal Foch received the German emissaries. French subscribers have guaranteed a permanent upkeep fund.

An Oil of Merit.—Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

## Remission of Duty

Remission of duty on breeding ewes and Rambouillet rams imported into Canada from the United States has been granted, covering the three months' period from September 1st to November 30th. Announcement to this effect has been made by the Department of Agriculture.

In Korea women are taught that the greatest feminine virtues are humility, silence and timidity.

## Constipation Ended

Restore your energy, get rid of indigestion and dyspepsia, make ten years younger, by making the bowels and liver active with Chamberlain's Tablets. Fifty in a Bottle—25c

# Immense Floods of Golden Grain From Western Prairies Now Pouring Through Lake Terminals

At the port terminals, particularly of Port Arthur and Port William, the Canadian wheat harvest is literally poured through the greatest grain-handling equipment in the world, like a wonderful Niagara of pure gold, says the Ottawa Citizen. There are 26 such grain castles looking out over Thunder Bay at the Canadian head of Lake Superior. They contain 64,705,000 bushels of grain. Most of Canada's 400 million bushel wheat crop is poured through this rapacious spout. As much as 5,675,000 bushels has been shipped through in one day. For miles back into the country the long grain trains debranch on Port Arthur and Port William. More than 270,000 cars of grain from western points have been unloaded in one crop year. At one Port Arthur elevator, the cars are picked up by electrical tipping machines, which empty the grain into hoppers at the rate of one car every seven minutes.

Unloading the cars is the first step in the process of transferring the grain from the railways to the lake freighters. The inside of a modern elevator is something more than a row of bins. It is as different from the ancient granary as the modern power-house is from the picturesque old water-wheel. It is a triumph of mechanical engineering. As the millions of bushels of grain flow through, the wheat can be separated from oats and other cereals which sometimes get mixed up in the threshing at the farm. Even the broken kernels can be extracted, leaving nothing but the whole grain to pass through. There is special machinery for handling damp wheat, and for drying it. Nothing that can be salvaged is thrown away. The stray ears of wheat that have been missed by the thrasher on the prairie are gathered in for threshing at the terminal elevator.

The elevators at Port Arthur and Port William line the water front. They occupy over ten miles of harbor frontage, in actual use for the loading of grain vessels. Some of the huge ships are as long as ocean liners, with capacity to carry 500,000 bushels in one cargo, which can be poured aboard at the rate of 100,000 bushels an hour. The sailing of a grain-laden boat down Thunder Bay, with the sun setting over the prairie country behind, and glinting in the towering elevators, is an inspiring sight.

## Oxford Students On Farms

Returns to England After Harvesting Experience in Saskatchewan

Thirty students from Oxford University and Wye Agricultural College, Kent, returned home on the Canadian Pacific steamship, "Montclair," after having assisted in the harvesting of the Saskatchewan crop. These young men were brought out by the Department of Colonization and Development, Canadian Pacific Railway, and placed on selected Saskatchewan farms by the Women's British Immigration League. They were without exception enthusiastic over the country and its possibilities. A few had remained permanently in Western Canada, and the opinion was expressed that within two years at least twelve more would be back in Canada for permanent establishment.

## Leads Trade With Russia

United States Has Lost First Place To Britain

Great Britain has captured first place from the United States in the volume of trade with Russia. In 1925, despite the absence of diplomatic recognition, the United States led the world in Russian trade, but this year has fallen to third place. According to the statistics of the Trade Commission for the last 11 months, the order of trade was as follows: Great Britain, \$145,000,000; Germany, \$131,000,000; United States, \$61,000,000; France, \$27,000,000, and Italy \$26,000,000.

## Cheap Power for Ontario Farmers

The Ontario Government is spending \$1,000,000 during the present fiscal year to make hydro-electric power available to the farmers of the province. This follows the plan begun by the Durney Government, of paying one half cost of primary line construction, and later extended by the Ferguson Government to secondary line work as well.

It is now possible to buy air tickets in London for fifty-two different centres.

Never put off till tomorrow what you can do today—there may be a law against it by that time.

W. N. P. 162

## Dominion Experimental

### Farm Report

Summaries of This Important Work Carried on by Federal Government

A statement in the very comprehensive report of the Director of the Dominion Experimental Farms for the year ending March 31, 1926, that should receive the particular attention of all horse breeders is as follows: "This year no trouble has been experienced with navel ill in the foals, possibly due to the fact that potassium iodide had been administered to the foal mares during their gestation period as a preventative."

The report, which can be had at no cost by applying to the Publications Branch, Ottawa, contains summaries of not only the extensive work carried on at the Central Farm in Ottawa but at all the more than thirty branch farms, stations and sub-stations, stretching from Prince Edward Island to British Columbia and from the most southerly limits of the country in the far north. In the report will be found informative notes on every branch of agriculture with special attention paid to some lines, such for instance as the fox industry, for the securing of greater knowledge and the betterment of which an experimental ranch has been established at Summerside, P.E.I.

It has been said that the vast work of the Dominion Experimental Farms, is not sufficiently known; here in Director E. S. Archibald's report is an excellent opportunity to gain such knowledge.

## U.S. Wants Western Ponies

If Trained for Polo Playing They Bring Good Price

Polo ponies from Western Canada are in demand in the United States. Between 200 and 300 ponies have been shipped this year from points in Alberta and other parts of the Canadian West to New York and Boston, the principal markets for these steeds.

Some of the ponies have brought as high as \$1,500 when fairly well trained. It is an acknowledged fact that it is a difficult matter to obtain first class ponies with the required qualifications of hardness, gentleness, intelligence, agility and size. The best ponies are half to three-quarter brood, the sire being a thoroughbred and the mare of the selected, untamed type.

Demand for polo ponies from the United States is consistent and continuous, according to authorities on the subject. The Canadian Government department of agriculture is encouraging the breeding and training of the polo pony.

## Mining Industry Flourishes

Increased Demand in the World for Mineral Products

Addressing a gathering of business men at a luncheon called by Mayor Webb of Winnipeg, Dr. Charles Campbell, Deputy Minister of Mines, said: "In no country in the world is there a better outlook in the mining industry than in Canada, and we may expect the industry to expand and that rapidly." He based this opinion, he said, not only on the vast unprospected territories but to the almost unbelievable increased demand in the world today for new mineral resources.

## Nobody But Doctors

A doctor as bridegroom, a doctor as bride, both the children are doctors, with physicians' daughters as bridesmaids, a doctor's son as page, the bride given away by a doctor, the best man a doctor, and a doctor at the organ were features of the wedding of Dr. Edward Eldridge Blomfield and Dr. Elizabeth Broadley, practitioners at Pontefract, England. The clergyman was not a physician.

## Saskatchewan Egg Production

The recently organized egg and poultry pool in Saskatchewan has 17,000 members, according to the Canadian Government Information Bureau. Egg production in that province is 33,672,263 dozen yearly, while as a poultry raising province Saskatchewan is now second only to Ontario.

## Air Travel Becoming Safer

Between 1919 and March 31, 1926, air transport flying under British control covered a total of 4,563,000 miles with only four accidents, that caused thirteen deaths. This is equivalent to one accident in every forty-six trips around the world.

Queens of some species of ants live fifteen years and longer, the workers living four or five years.

There are about 170,000 men and women in prisons of the United States.

## Early Settlements

Trading Posts Established in Northern Saskatchewan Before the Fall Of Quebec

Prof. A. S. Morton, University of Saskatchewan, who recently spoke at a meeting of the Prince Albert Historical Society, raised the question as to whether trading posts were established by the French traders in what is now the Prince Albert district long before the fall of Quebec in 1759. That there was a fort operated by French traders in the Carleton district, before the coming of the Hudson's Bay Company is fairly definite, and pioneer settlers remember the buildings at the mouth of the Shell River, six miles west of Prince Albert.

Prof. Morton is endeavoring to fix the location of these and the historical society has decided to institute a search for the ruins of these forts besides securing all data concerning them that can be found and to this end investigators will visit these places in the near future.

## U.S. Investments In Canada

Estimated Nearly Three Billion of American Money Invested in Canada

United States Investments in Canada and Newfoundland at the end of 1925 totalled \$2,825,000,000, or \$200,000,000 more than at the beginning of 1924. United States purchases of bonds done in 1924 were \$211,956,753; in 1925 approximately \$175,000,000, and in the first half of 1926 \$76,000,000. Some idea of the rapid growth of United States investments in Canada can be gathered from the fact that in 1900 the total amounted to only \$150,000,000. By 1913 these investments had quadrupled, and since then have rapidly augmented.

## Minister Invented Reaper

Model Made by Scotchman Century Ago Was Not Patented

Those misguided persons—and there are many of them—who believe that the reaping machine, now used all over the world, was invented in America, will be disillusioned by the announcement that the invention was that of a Scottish minister. He was the Rev. Patrick Bell, who made the first model a hundred years ago. It was never patented, and was given to Dundee Museum, whence it was subsequently stolen. Centenary celebrations are to take place this year.

To Exhibit at Chicago Grain Show

Leading grain growers of Saskatchewan are preparing to exhibit samples of grain at the Chicago International and the Toronto Royal shows, according to M. P. Tullis, Field Crop Commissioner. At least two previous championship winners are again in the field this year while many others have grain of such high quality as to feel confident of awards.

## B.C. Cattle Ranchers Co-Operate

Cattle ranchers of the Interior of British Columbia are to form a co-operative selling organization this year, according to the Department of Agriculture. This new association will be ready to function next year, handling practically the entire output of the interior.

## World's Largest Co-Op.

Remarkable Growth of Wheat Pool Movement in Western Canada

Membership in the Canadian Wheat Pool totals, according to the latest available figures, is now 131,458 actual farmers in Manitoba, Saskatchewan and Alberta, controlling nearly 15,000,000 acres sown to wheat. The pool now owns 638 line elevators with an appropriate total capacity of 20,000,000 bushels. It also has six terminal elevators at Port William and one at Buffalo, N.Y., with a combined capacity of about 20,000,000 bushels.

Though only organized three years ago the Canadian Wheat Pool is now the largest farmers' co-operative agency in the world. The pool sells its wheat through a Central Selling Agency, which has agents in 51 ports of the world.

Membership in the Canadian Wheat Pool is increasing continuously. About 75 per cent of the total acreage in Canada sown to wheat is controlled by the Pool.

## Satisfied Settlers

British Families Who Located in Peace River Country Are Pleased With Conditions

The families that migrated to the Peace River country during the present year are all well pleased, satisfied with progress to date and enthusiastic of the future, according to J. A. McLeod, field supervisor of the Soldiers' Settlement Board at Wembley. It is also learned from the Assistant Manager of the Canada Colonization Company that 95 per cent of the Mennonite settlers who were placed in Manitoba, Saskatchewan and Alberta have "made good."

## Scientific Agriculture

Thirteen Agricultural Colleges Now Established in Canada

Scientific agriculture is making headway, there being now thirteen agricultural colleges in Canada, as compared with two in pre-war days. President Reynolds of the Ontario Agricultural College of Guelph estimates the value of scientific instruction to graduates of his college in the past eighteen years at \$131,000,000. Selective breeding has done much to improve the strains of wheat, oats and barley—to mention one leading activity of the college.

## Paper From Straw

Western Canada Pulp and Paper Company to Utilize Straw for Paper Manufacture

It is reported that a group of Edmonton business men have completed preliminary arrangements for the formation of a company to be known as the Western Canada Pulp and Paper Company, for the express purpose of manufacturing paper from straw by a special process invented by Mr. Bache-Wilg. A Dominion charter will be applied for and the company capitalized at \$500,000.

A correct guess passes for wisdom even though it is only a guess.

There are more than 1,000 women mills in the United States.

# Face of the Earth Changing By Westward Drift of Continents Is Strange Theory of Geologists

## Silk From Wood

Millions Invested in Artificial Silk Industry in Canada

Canada is moving forward in the rayon industry, or the making of artificial silk, and her future is bright with promise; bearing in mind her vast resources of timber that form the raw material of the fabric. A report issued by the Natural Resources Intelligence Service of the Department of the Interior shows much progress in recent years. As, per example, Courtdlands Limited, the largest manufacturers of the product in the United Kingdom, have a \$2,500,000 plant in Cornwall. The Celanese Ltd., a \$7,000,000 concern, is constructing a large plant at Drummondville, Que. The Howard Smith Paper Mills have formed a subsidiary company called the Canadian Cellulose Co. to be operated in Cornwall, Ont., and the B. C. Pulp and Paper Company is carrying on chemical research into the use of hemlock, with good results to date. Other concerns are reported to be making preliminary moves towards establishing plants.

## An Important Industry

Women in Vancouver Are Making Money Seed-Growing

Interesting variations of flower gardening for profit are shown by Women's Institute Members.

For instance the seed-growing industry in the province is very important and many women are engaged in it. Lavender is grown quite extensively on Vancouver Island and is equal to that grown in Somerset, England.

Two women close to Victoria, who have half an acre, have started the manufacture of lavender water. One member in the Kootenay district has gone in extensively for immortelles and this year will have a very large quantity of seed for sale. Another member has one of the largest collections of rare varietals and is growing more for seed than flowers. On Vancouver Island women in many parts have been growing seed for years and selling their crop to larger growers who market the seeds in England.

## Southerner Impressed With West

Surprised to Find That Vegetables and Fruit Trees Do So Well Here

In giving his impressions of western Canada, L. A. Niven, Horticultural Editor of The Progressive Farmer, Memphis, Tennessee, expressed surprise to find large quantities of vegetables grown, fruit trees in many parts, shade trees around the farm homes and flowers in brilliant luxuriance. "To my surprise," he said, "I found apples growing in nearly every section of western Canada—not on a commercial scale, except in British Columbia, but grown nearly everywhere for home and local markets. Hardy varieties found there included the Siberian Crab, the Duchess, Lowland Raspberry, Blushed Calville. Some hybrid crab's were: Jewel, Sylvia, Prince, Norman, Transcendent, Florence, Virginia and Hyslop. British Columbia grew the regular American varieties.

## Time Proved Theory Correct

English Farmer Advocated Vaccination Long Before Dr. Jenner Tried It

Although vaccination is linked with the name of Jenner, there is ample evidence that it was practised by farmers and others in the rural districts of England long before his day. It was common knowledge amongst these people that an attack of cowpox immunised the sufferer against small pox, and it was quite usual for farm workers to infect themselves and their children with the former complaint to protect them against the latter. Indeed, twenty-two years before Dr. Jenner made his first vaccination, a farmer named Benjamin Jesty, of Downhay, openly advocated the practice; but, not being a medical man, he was laughed at for his pains. Time has, however, proved his theory correct.

## Maple Leaves for Britain

The maple leaf, Canada's emblem, is in demand in England. From the office of the Canadian high commissioner in London comes a request for Canadians to send over maple leaves which may be used for decorative purposes at public dinners during the year.

Some of the cypress used by Egyptians to make mummy cases is 3,000 years old and is still in a good state of preservation.

Berlin has more than two hundred bee-keepers who have more than three thousand hives on the flat roofs of buildings.

One of the most bizarre, yet significant, theories ever advanced by scientists, is now being tested by a network of radio stations covering most of the earth's surface.

The hypotheses offered by Professor Alfred Wegener of the University of Graz, Austria, and Dr. William Schutte, German geologist, are that all land masses of the earth once formed a single continent before splitting up into the continents we know; that they are still co-forming and perceptibly drifting westward and equatorward; that Europe is shrinking, France and Germany are sinking, and Norway and Sweden are rising higher from the sea!

Observations taken at the radio stations at five-year intervals, says the November Popular Science Monthly, will either prove or disprove this strange theory. Whether Greenland is drifting westward at the rate of 100 feet a year, and other masses at a slower rate, as is now tentatively held, may be established definitely in ten years.

Professor Wegener points out as evidence in support of his theory that the outlines of the present day continents fit as nearly into the supposed super-continent as a jigsaw puzzle. The west coast of Africa, for example, fits at most perfectly the eastern coast of North and South America.

Professor Wegener says that the attraction of the sun and moon on the earth's surface broke up the super-continent and caused the western drift. How the solid earth can drift is explained by the fact that the surface rock, called chert, is softer than the igneous rock nearer the earth's core, on which it floats.

## London's Newspaper Home

Publications of Many Years Are Stored At Hendon

Hendon, just outside of London, is the home of the world's greatest storehouse of newspapers and "pall books"—those ancient lists of voters which rich American tourists turn over so feverishly in quest of their English origin.

Hendon houses, indeed, more newspapers than can be found anywhere else in the British Isles. Newspapers have been pouring into Hendon by the ton for more than twenty years. They are stored in vast fireproof rooms and sent away to be devoured by some tedious reader, but the great bulk of them will never be read again. They are being looked after merely because somebody may walk into the British Museum one morning and ask the clerk for a copy of the "Palladium on the Pall Mall Gazette" of the second week in January in the year 1752.

London's great home for the newspapers of the past is in Colindale, where repose millions of newspapers, news sheets from every remote village and hamlet in the kingdom.

All the newspapers that go to Hendon spend a few months probation in the archives of the British Museum itself. They are then sent to the blunders, where they are neatly and securely bound. They are returned to the museum and later sent out to Hendon. Once every week the museum's motor van journeys out to Hendon and returns loaded with old newspapers from "The Repository"—those are the periodicals which museum readers have asked for. The volumes when finished with are returned to Hendon.

London newspapers, curiously enough, never leave London. They are all kept in the Museum itself.

## New Idea For Mail Boxes

Mail boxes on wheels are proving a success at Amsterdam, where collection boxes are attached to the backs of trams going toward the general post office. At the halt in front of the post office the boxes are emptied and letters are rushed to the sorting rooms saving several hours time in collection.

## Carload of Trout

A carload of trout weighing 22,000 pounds arrived at Edmonton recently from Great Slave Lake and was sent on to Minneapolis for distribution. Three further cars are expected shortly from the same source.

The railway engineer may not be a leader of society, but wealth and fashion frequently follow in his train.

Hired mourners in Mesopotamia pull out their hair to demonstrate the genuineness of their grief.

Greenland, with an area of 827,300 square miles, is the largest island in the world.

Australian Cricketers Here

The Australian Cricket Team, heroes of the five test matches against England this summer, returned from their eight months trip by the All-Red Canadian Pacific Route from Liverpool to Victoria in October. They sailed on the Canadian Pacific liner Montrose for Quebec where they arrived October 8 and whence they came on to Montreal. They spent Sunday and Monday in New York and went on to Niagara Falls as guests of the Ontario Government and then to Buffalo, Chicago and St. Paul. They reentered Canada and passed through Moose Jaw, Swift Current and Medicine Hat and on reaching Calgary stayed at the Hotel Palliser, and were the guests of the Mayor. Thence they

went through the Rockies from Banff to Field, Revelstoke and Kamloops. At Vancouver the team were entertained by the Mayor and were also the guests of the city at Victoria. They sailed from the latter city for Australia on the Canadian Australasian Royal Mail Line Aorangi and are due to reach Sydney about November 13. The team is made up of the following: Top row: J. L. Ellis (c), C. Hendry, J. M. Gregory, J. S. Ryder, A. J. Richardson, S. C. Everett, Sydney Smith, (manager), Middle row: A. A. Mailey, C. V. Grimmett, Warren Bardsley (vice captain), H. L. Collins (captain); C. G. Macartney, T. J. B. Andrews, J. M. Taylor. Front row: W. M. Woodfull, W. H. Ponsford, and W. A. Oldfield.

## Sell Bread Of Oven Freshness

Your customers want fresh bread because it tastes better. Appleford wrappers will seal your bread from the air and keep it fresh a day longer. More sales for week-end and holidays—no drying out and loss of weight—few store returns.

Appleford wraps are so strong they won't tear or crack under the corners. We will make a distinctive design for you.

## WORLD HAPPENINGS BRIEFLY TOLD

More than 1,000 employees at the Dowlais Steel Works, Cardiff, Wales, who have been idle since the general strike last May, have returned to work.

Fire destroyed a \$20,000 clam plant of the Strawberry Point Packing Company at Cordova, Alaska. Boats used by the plant and stored for the winter were burned.

Gilbert Robinson, secretary of the Ontario Motor League, stated that Ontario motorists will save \$1,700,000 through the proposed reduction in the cost of Ontario automobile licenses and the new system of taxation.

Reprisals for resorting to poison gas warfare by employing gas against a country violating the anti-gas agreement, were opposed in the preliminary disarmament conference by Great Britain, China, Japan, and the United States.

Gold held against notes in circulation by the Minister of Finance September 24 last, amounted to \$112,337,282. This is approximately sixty-one per cent of the total circulation on that date which amounted to \$287,423,317.

The five day week with six days pay has reached the Pacific Coast. David Crowley, general manager of the Crowley Shipbuilding Company, Oakland, Cal., today announced he is preparing to put the new plan into effect in the shipyards in Oakland, where the company employs approximately 200 men.

Lieutenant-Commander Richard H. Byrd, of North Pole fame, intimates that he might attempt a flight to the South Pole. "I am afraid I am going to try for the South Pole, too," said Commander Byrd. "I'm not saying much about it, though. It's all in the future; nothing definite as yet."

## Aged Missionary Is Attempting Big Job

Will Revise Translation of Old Testament into Amoy Dialect

Seventy-seven years old, and for 52 years a missionary on the island of Formosa, Rev. Thomas Barclay, of London, is returning thence after a six months' holiday, to spend three years revising the existing translation of the Old Testament into the Amoy dialect. He can complete the job in three years only if he finds it possible to work six hours a day for six days each week. Otherwise it will take him longer.

## Alberta As a Game Province

Alberta has the most wonderful wild game hinterland in North America, according to Adolf Muller of Norristown, Pa., Game Commissioner for that state. He expressed that opinion after spending a month in the interior of the province, exploring and taking motion pictures, including some of caribou on the track.

## TEETHING BABIES Thousands of Them DIE EVERY SUMMER

The hot weather is very hard on babies starting to cut their teeth. On the first sign of any looseness of the bowels the mother should give a few doses of

This will quickly offset the diarrhoea, vomiting and purging, and, perhaps, save the baby's life. Put up only by The T. Milburn Co., Limited, Toronto, Ont.

W. N. P. 1652

## Edison Changes His Attitude

Says He Now Believes in Life After Death

Thomas A. Edison, after varying degrees of skepticism on the question of immortality of the soul, has made known his belief that the evidence is in favor of life after death.

In an interview, published in the November Forum, the inventor admits he sees nothing incredible in the possibility of the soul's being immortal. He urges religious teachers to study the subject and try to build up proof which skeptics cannot laugh at.

His latest attitude is at variance with previous stands.

Six years ago he said he was "dabbling" with apparatus with which he hoped to communicate with spirits, and then he later said "it was all a joke."

In 1921 he said, "My brain is incapable of conceiving of such a thing as a soul."

In his earlier years he and Luther Burbank were leaders in the Free Thinkers' Society.

## First Twopenny Post Lacking In Dignity

Not Considered Good Form to Use It For Private Letters

Protests at the humiliation of having trade advertisements stamped by the Post Office on our correspondence may recall the days when postal communication of any kind was considered a little lacking in dignity. Miss Louise Courtney in her reminiscences says that "when the London twopenny post was first established it was not etiquette to make use of it for private letters. I remember my father's annoyance when a stupid footman posted a letter to Sir Robert Peel instead of sending it by a groom. 'It seems so impertinent,' he said, 'to send a letter to a man like Sir Robert Peel by post.' Invitations and their answers were always sent by hand." — Manchester Guardian.

## Mountain Peak Easily Reached

People of Vienna Use Suspension Railway to Avoid Long Climb

The fortunate people of Vienna are now able to enjoy the delights of sports on a peak 5,000 feet above sea level within little more than two hours of leaving their front doors.

Austria is, of course, one of the lands of the Alps, and at holiday times the call of the mountains is strong among the city folks. The Rax Alpe, a journey of 110 minutes from Vienna by train, has 140 paths to its summit worn by the feet of countless travelers.

The trouble is that the climb takes three hours in the ordinary way, but to get over this difficulty a suspension railway has been built up the mountain by which people will be able to ascend 3,300 feet in ten minutes.

## Queen Marie Lavish With Tips

Everybody who works on the Levantine hopes Queen Marie of Rumania will come again. Her largest tip was about \$1,500. The lowest tip was \$5. Several stewards got \$50. One steward was given a gold watch; stewards received diamond brooches. The Queen gave \$200 for the ship's sick fund and \$500 for the smokers for the whole crew.

## Makes Good Showing

If the Scriptures distributed by the Papan agency of the American Bible Society during 1925 could be piled up, copy by copy, they would run up into space about 11,316 feet, or 1,459 feet higher than the mountain Fuji. If laid out end to end they would extend 80 miles.

What is the difference between pneumonia and pneumonia?

Search me.

Why, pneumonia comes in bottles and pneumonia comes in chests.

A cow belonging to Rutgers University gave 21,136 pounds of milk in 305 days, or fourteen times her own weight.

## The Planet Mars

Scientists Will Endeavor to Discover If Planet Is Inhabited

Observations now are under way at the Greenwich Observatory which may definitely prove or explode the theory of human habitation on Mars. Not since 1826 has the planet been in a position so favorable for scientific study.

Although Mars is 8,000,000 miles farther from the earth than it was two years ago, the fact that it will be visible 32 degrees higher in the sky, where the atmospheric handicap is thinner and consequently clearer, will make the observations far more accurate than at any time since the advent of modern astronomical methods.

For the next few months the scientists will concentrate their attention on the so-called Martian "canals," about which the dispute over human habitation is centred. One school of scientific thought contends that three geometric lines on Mars plausibly could be canals built to obtain water from the melting polar caps to irrigate an arid planet. Those who discard this theory declare that the "canals" are merely an optical illusion.

## A Model Town

Fort Alexander, Man., Laid Out on Modern Lines

A model town is springing up in Manitoba at Fort Alexander, where work on the new mill of the Manitoba Pulp and Paper Company is being rushed to completion. It is expected that the mill will commence production in November.

A town is being built to house the mill employees and accommodation is being provided for 1,000 persons. Light and sewage systems have been installed and the town laid out on the most modern lines. In addition to homes, the company has built office buildings, stores and a motion picture theatre.

1423

The Dolman Sleeve an Important Development in Coats

Mionnet gives this coat distinction with her new, loose sleeve, and the woman who saunters with the fashion will admire its style and adaptability. The coat presents a straight-line silhouette, with fur-trimmed convertible collar, and long rolling revers that end in a wrap-over closing. The small back view and diagram picture the simple design of No. 1423 which is in sizes 31, 36, 38, 40 and 42 inches bust. Size 36 requires 4 1/2 yards 54-inch material; lining 4 1/2 yards 36-inch, 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

## The Generosity of a "Cop"

Police forces are much in the acid glare of public criticism; rather quickly they become noted for their failings or their virtues. In the lives of the man whose luck is out they have become something of an Nemeses. They fail sometimes to discern the human qualities of the policeman beneath the stern mask of the disciplinarian; qualities that have made the London "Bobbies" noted for their patience; the New York "Coppers" for their quick good humor, or the Paris gendarmes for their tact.

Incongruously, there has been more than one "down and outer" who will swear by Constable Hawkins, who may be observed almost any day standing at the entrance of the Canadian Pacific Windsor Street Station in Montreal. He is a member of a smaller constabulary in Montreal—the Canadian Pacific Police—whose services rendered far exceed their daily duties. From the great tide of humanity of cosmopolitan flavor that crowds Windsor Street Station, not a small part is of immigrant calibre. They seek the check room and unencumbered go out to see the town. Sometimes they have little money and what they have is soon gone. A twenty-day hunt for work ends in failure, and they think of their baggage in book, as it were, and the ticket in their pocket to some western farm. There is one fixture at least in this place where they come and go—Constable Hawkins—to whom many have turned in desperation the "down and out" advances. Would he lend him two dollars to get his grips? Yes, he will—and does. Wonders of wonders. And the man boards the next train for the west.

Constable Hawkins states that he has performed this small favor perhaps a dozen times—and the wonder of it is that never once has he misjudged his man.

## Has a Curious History

Very Few People Know How Word "News" Originated

The word "news" which is so important in our present-day existence, has a curious history. Before the advent of newspapers events of general interest were posted in public places under four columns, headed: N. E. W. S. In the column headed "N" happenings from the North were recorded; in column "E" from the East; in the "W" column were recounted occurrences in the West, and under "S" came Southern notes. Gradually these four letters were joined to form the word "News" as we now know it—embodying in itself reports from all points of the compass.

## Reason Was Obvious

"Doc," growled the man who had been put on a diet, "why do you always order a fellow to cut out the things he likes?"

"Because," snapped the doctor, "he never eats or drinks the things he doesn't like, so it stands to reason it must be the things he does like that are disagreeing with him."—Cincinnati Enquirer.

## B.C. Apples For Britain

It is expected that the refrigerator lines carrying apples out of Vancouver to the United Kingdom and Europe will have an exceptionally large total this year. Three lines carry the fresh fruit, the Royal Main Steam Packet Company, the Furness (Pacific) Limited and the Blue Star line. The first apple shipments were made early in October.

Why isn't a wife the better half when she is always getting the better of the other half?

Don't believe that a woman believes all that a man believes she believes.

## Canada's Vital Investment

By C. W. Peterson

Accepting Prof. Irving-Fisher's estimate of average value to the state of \$3,000 for each productive citizen, we may logically conclude that it would apparently be sound business to expend up to this amount upon the maintenance, education and training of the native-born child until it reaches the productive age, or, in order to compensate for a falling birth rate, or to speed up settlement, upon propaganda and other effort to transplant in Canada an acceptable person of productive age from another country. Records show that since 1870 we have brought somewhat over 1 1/2 million people to Canada at a direct cost to the government of 37 million dollars. Estimating the expenditure of the railways, provinces and other active agencies at an additional 45 million dollars, the aggregate cost would be \$82 million dollars, or an average cost per head of less than \$20. Has Canada over spent money more advantageously? Is it conceivable that any national investment could possibly yield greater returns?

It is instructive to contemplate the unfriendly attitude of European nations towards the emigration of their citizens, except to their own overseas possessions. No matter how fierce the economic pressure, how wide-spread unemployment and distress, no progressive nation deliberately promotes emigration to evacuate obvious surplus population. There is, on the contrary, a keen appreciation of the potential value to the state of the vital asset, and nations will go to almost any lengths and incur the most fantastic expenditure on relief, to preserve this precious asset intact during periods of economic stress, in the hope of the unemployed population being ultimately absorbed in gainful production.

The colonization problem in Canada is not in any sense a class problem. Every citizen, irrespective of occupation, has a direct financial interest in its effective solution. If every class of the community would intelligently study the effect of an increased producing population upon its own fortunes, we would speedily create a favorable mass opinion on this subject.

## Performed Daring Feat

Men Climbed Highest Mountain in Scotland on a Motorcycle

Up Ben-Nevis, Scotland's highest mountain which has an altitude of 4,406 feet, on a motorcycle, was the daring feat recently accomplished by two men. In order to prove the authenticity of the ascent the cyclist obtained written credentials from climbers en route. The machine proved itself a good hill-climber, and bore its burden to the mountain top in 2 hours 40 minutes. Some idea of the accomplishment may be had when it is mentioned that the bridge path to the top is in a bad state of repair, and great difficulty was encountered when the washed-down gravel beds, which are interlaced with boulders, had to be crossed. When the base was reached it was found that the rear brake had been practically worn through.

## Heavy Postage on Parcel

Carried by U.S. Air Mail Had \$150 In Stamps

What is believed to be a new record for high postage paid on a single parcel was established at Philadelphia when a package was sent from there to San Francisco by air mail varying \$150 in stamps.

Postal regulations prohibited clerks divulging any description of the package, its contents, or recipient, but the parcel was nearly covered with \$5 stamps. The air mail postage across the continent is \$4 a pound.

The package went to New York and thence by plane westward.

## Canadian Securities Are Sound

"More and more the United States investor is demanding that Canadian securities have a place in his portfolio," according to Lewis L. Strauss, eminent banker of Kuhn, Loeb and Company, New York. "The fact that Canada can borrow money in the United States at a very low rate of interest," he said, "is proof positive how much her securities are in demand south of the line."

A Cleveland, Ohio, man claims to have discovered an upright piano that is 125 years old. He probably attributes its longevity to its upright character.

First Burglar—"Come on! Let's figure up and see how much we made on this haul."

His Pal—"Shucks! I'm tired. Let's wait and look in the morning paper."

About the most helpless thing on earth is an automobile seven miles from a country store with its gasoline tank run dry.

## A Business Governor

Lord Willingdon Will Keep Office Work Separate From Home Life

Lord Willingdon, the new governor-general of Canada, has announced that he will be at his office at the Parliament Buildings at Ottawa daily at eleven o'clock to transact official business.

The significance of this announcement lies in its novelty so far as the Ottawa precedent is concerned. Heretofore the governors used their up-town offices but little. They have been in the habit of having official documents sent to Rideau Hall, the official residence. That practice entailed some loss of time and embarrassment when speed was a factor.

Lord Willingdon's departure from accepted routine suggests that he proposes to inject business methods into an office which many people regard as more ornamental than practical. There is nevertheless, quite a lot of work devolving upon the governor-general in connection with affairs of state. His signature to documents is essential. According to the new representative of the King, those who have business to transact with him will know where to find him. He does not believe in involving his home life in the details of his office. That is the way most efficient executives do things. It is a good sign.

## SUNDAY SCHOOL LESSON

OCTOBER 31

THE EVILS OF STRONG DRINK (WORLD'S TEMPERANCE SUNDAY)

Golden Text: At the last it biteth like a serpent, and stingeth like an adder. Proverbs 23:32.

Lesson: Proverbs, 23:29-35.

Devotional Reading: Psalm 97:1-6, 10:12.

## Explanation and Comments

1. A Picture of a Drunkard, verses 29, 30. By a series of questions the writer of these verses gives us a vivid picture of a drunkard. "Who hath Oh! Who hath Alas!" the Hebrew literally reads, for the words translated woe or sorrow are interjections, not nouns. Woe and sorrow come to everyone sooner or later, but the drunkard creates them for himself. "Who hath contentions? Who hath complainings?" Drunkenness embroils men in quarrels and strife. "Who hath wounds without cause?" Drunken men come to blows over nothing, without knowing why or wherefore. "Who hath redness of eyes?" Bleared eyes are one of the conspicuous signs of the drunkard.

The speaker then answers his own questions: "They that tarry long at the wine; they that go to seek out mixed wine." By mixed wine may be meant wine mixed with spices or opiates. "There is a touch of sarcasm in this answer; the word elsewhere used of diligent search after knowledge is here used, as if ironically, of the investigations of connoisseurs in wine, meeting to test its qualities." (Dr. Plumptre.)

"Whether or not the world would be vastly benefited by total and final abolition of all intoxicating drinks seem to me not an open question. Three-fourths of mankind confess the affirmative with their tongues, and I believe all the rest acknowledge it in their hearts." (Abraham Lincoln).

## Growth Of Manufacturing

Industries Shown to be Making Rapid Progress in Western Canada

The manufacturing industries continue to make progress in western Canada, according to a recent return of the Dominion Bureau of Statistics. Between 1923 and 1924, \$17,584,928 was added to the capital invested in Manitoba industries, \$377,712; in Saskatchewan, \$5,806,674 in Alberta and \$34,431,907 in British Columbia. The net value of production in Manitoba in 1924 was \$43,215,250; in Saskatchewan, \$614,134,784; in Alberta, \$26,142,286 and in British Columbia, \$85,361,982.

## Contract Doctors in Germany

There are more doctors in Germany than there are patients to support them, and hundreds of physicians are on the "unemployment" lists. That is because of the growth of state and city clinics, to which any German can belong. Four out of five people do belong to them, and get their medical attendance from contract doctors for a very small fee.—Youth's Companion.

## Sneezing?

The sign of a coming cold. Bathe the feet in Minard's and hot water. Also inhale.

## Many Killed And Injured In Violent Earthquake That Shakes Armenia

Leninakan, Armenia. — Successive earthquakes lasting from Friday night until early Sunday destroyed the greater part of this city of 40,000 inhabitants and twelve thriving towns in the neighborhood, killing upwards of 400 persons, mortally injuring hundreds of others and rendering 100,000 homeless. The whole of Armenia has been terrified and the destruction amounts to millions of dollars.

Leninakan, christened after Nikolai Lenin, the idol of Soviet Russia, is like a vast sepulchre of ashes. From time immemorial Leninakan, formerly Alexandropol, has been a gigantic volcanic amphitheatre, due to the activity of Mount Ararat and Mount Alagoz in the Tertiary period, but the city never before experienced such a violent and disastrous upheaval as that which levelled nearly all human habitation on the great Leninakan Plain Friday night.

The second shock, which was five-fold stronger than the first, tore open giant fissures in the great volcanic mountain of Alagoz, which is 14,400 feet and gleams with perpetual snow.

The precise number of dead in all the affected areas, which cover 100 square miles, will not be known for several days, as telegraphic communication has been destroyed. Frantic efforts are being made by soldiers of the Red army, firemen and relief workers, to extricate those buried alive.

Entire communities were disrupted by successive earth shocks and bodies scattered everywhere in grim disorder. The terror of the populace was increased by the fact that the earthquake occurred in total darkness, the first shock having dislocated all the electric and gas mains, and further subterranean convulsions recurring through the night caused the untutored peasantry to fear that the end of the world had come.

## Farmers Receive Final Payments For Wheat

Cheques Mailed To Members Of Saskatchewan Pool Total \$1,094,056 Regina.—Farmers who signed Saskatchewan Wheat Pool contracts will receive \$1,094,056.68 in the final payment from the Pool for their 1925 wheat, according to an official statement issued by pool officials. Cheques covering payments on the basis of five cents a bushel for No. 1 Northern, less deductions for carrying charges in country elevators, operation and construction costs and commercial reserves have been sent out from the head office. The average price per bushel paid was \$1.45. From this the elevator and commercial reserve deductions and carrying charges were made.

**Advertising Plan Dropped** London.—It is understood the government intends dropping the postmark advertising scheme which has aroused strong opposition from the large advertisers throughout the country, or limiting the advertising in such slogans as "buy British goods."

**Object To Coat Of Arms** Victoria.—British Columbia's coat of arms is not acceptable to the British College of Heraldry, the provincial government has been informed. The college objects to use of a Royal Crown on the arms of a province.

## Canada's Civilians Who Suffered Loss Through War May Be Recompensed

London. — Though lacking legal status for their claims, Canada's civilians who suffered loss during the war are at last to be compensated.

At the next session the dominion parliament will be asked to consider legislation dealing with claims passed by the Pugsley reparations commission for war damages. Some time ago a bill was introduced to provide compassionate grants, but it fell through. Today there is \$3,000,000 in the Dominion treasury available for such payments. This is Canada's share of the reparations received to date under the Dawes plan.

Now it is understood Premier King will ask parliament to utilize this in settlement of civilian claims. Thomas Mulvey, under secretary of state, will take up with Britain, France and Ger-

## The Imperial Conference

STANLEY BALDWIN

Premier of Great Britain, who extended a welcome to the Imperial conference delegates in London.

## Did Not Attend Unveiling Of Tablet

**Irish Delegate To Empire Conference Explained Absence To Premier Baldwin** London.—W. T. Cosgrave, Irish delegate to the Empire Conference, did not attend the unveiling of a tablet to Empire war dead in Westminster Abbey. He sent instead Kelvin O'Higgins, vice-president of the council of ministers in Dublin, and explained his own absence in a letter to Premier Baldwin. In it he said that O'Higgins lost a brother in the world war, whereas he himself was engaged in the Easter rebellion in Dublin in 1916, in which British as well as Irish were killed.

Cosgrave added that he feared his presence might bring pain to bereaved Englishmen, although he, personally, would have felt honored by attending.

## Hoping For Straight Contest

**No Three-Cornered Fight In Ontario Election Looked For** Toronto.—Although discussion is rife with local politicians regarding the possibility of an agreement between Liberals and Progressives in the coming provincial general election, there is no indication as yet that such an agreement will be reached. The general impression seems to be that there will be no formal agreement but only a tacit understanding.

Prominent members of both parties concerned asserted that it was both probable and desirable that Progressives should not oppose Liberals, or vice versa, in any riding, but denied that there had been any meeting of representatives of the two parties.

**Hurricane In Isle Of Pines** Havana, Cuba.—The Isle of Pines was severely damaged by the hurricane which swept across the Caribbean on Wednesday, 32 persons being killed there, among them 17 Americans, and about 100 injured. This was the startling news brought to Havana after more than 48 hours without word from the Isle of Pines, which lies about 35 miles south of Cuba.

## Swept By Hurricane

**Thirty Dead And Three Hundred Injured In City Of Havana** Havana, Cuba.—Thirty persons were killed and 300 injured in the city of Havana by the hurricane that swept over the city and other sections of Cuba, according to an official announcement.

All the lower parts of the city were inundated, causing thousands of persons to need temporary aid and shelter.

Police and soldiers were patrolling the streets of the city to prevent possible attempts at looting.

President Machado ordered all places of business closed and instructed the police and military to shoot without warning any persons discovered attempting to carry out depredations.

A house in the Calle Fernandez collapsed during the storm, killing five persons and injuring eight. Another house on the Malecon was inundated and fell. Thus far the authorities have been unable to explore the ruins.

Many homes in the suburbs are reported to have been wrecked or seriously damaged. From the month of the harbor to the monument erected in memory of the officers and men who were killed in the explosion of the United States battleship Maine in 1898, the water at times was several metres deep along the Malecon. The Maine monument was destroyed except for the base.

## A Serious Question

**Premier Ferguson of Ontario Would Have Voters Consider Manifesto in Deliberate Way**

Toronto.—Premier Ferguson will be content with any verdict the electors of Ontario may pronounce at the polls, December 1, if in the meantime they will consider the proposals of the Ontario Government's election manifesto in a quiet, deliberate way, dealing with the matter as a condition and not as a theory, the Premier said in an interview here. Mr. Ferguson said:

"I have nothing to say about the comment made by a number of people, because apparently they have not criticized in any respect the grounds I've given in reaching my conclusions. I put before the public the general conditions as I see them, and am asking for a careful discussion and consideration of the problem. It does not serve any good purpose simply to declaim and shout 'Ferguson is tied up with the vote.' What Ferguson desires of the general public is to consider seriously this great question, which touches so closely the moral welfare of all manhood and womanhood of this province."

## Death Of Eugene Debs

**Picturesque Leader Of United States Socialists Passes Away**

Elmhurst, Ill.—Eugene Victor Debs, picturesque leader of United States Socialists for 32 years, died in a sanatorium here. He had been suffering intensely from neuritis for the last four weeks.

Five times as a Socialist presidential candidate, Debs lost a last hope. As leader of the railroad strike of 1894, which was finally put down by President Cleveland calling out federal troops, Debs was "first page" copy for weeks.

Debs was born in Terre Haute, Ind., Nov. 5, 1855.

## Is Representing Canada

Montreal.—The Right Hon. Charles Joseph Doherty, K.C., LL.D., former minister of justice in the Borden Government and one of Canada's leading legal authorities, sailed for England on Friday by the Canadian Pacific steamship Montcalm to represent the Dominion in the Labrador boundary dispute case before the privy council.

## Resigns From Cabinet

HON. A. P. McNAB

Who has retired from the post of minister of public works in the Saskatchewan government to take a seat on the local government board.

## Trade In Favor Of Canada

**Exports To South Africa Much Greater Than Imports**

Ottawa.—The announcement of Premier King in London of steps to negotiate a trade treaty with South Africa, while quite in keeping with the export trade plan of the government, raises some questions here as to just what concessions will be asked and given. It is presumed that Canada may ask pretty much what has been granted by Australia. South Africa already enjoys, automatically, the preferences extended under the Australian, New Zealand and West Indian treaties, although her products are not wholly the same. Figures for the last fiscal year disclose the trade to be very lopsided in favor of Canada. Imports from South Africa in the year totalled only \$86,114, while exports from Canada to that Dominion amounted to \$9,276,000. The principal items of imports were: fruits, \$17,000; hides, \$11,000; wool, \$21,000; and diamonds, \$29,000.

Canadian exports included motor cars, \$3,550,000; agricultural implements, \$617,000; pulp and paper, \$1,400,000; rubber goods, \$820,000; and wheat and flour, \$1,300,000.

## "Y" Expelled From Russia

**Property Of U.S. Representative Confiscated By Soviets**

New York.—The Soviet Government of Russia has expelled from that country the United States representative of the Young Men's Christian Association without expatiating the reason for its action.

Officials of the National council of the Y.M.C.A. in announcing this said they considered the action as a complete expulsion of their organization from Russia. Their representative, H. W. Anderson, who had been receiving physical education in Russia, was forced out of the country and his property confiscated.

## Hunters Die From Exposure

**Unable To Extricate Feet From Mud When Canoe Upsets**

Timmins, Ont. — Ernest Tate and Thomas P. Ireland, of Hamilton, died from exposure here when their feet were caught in mud beneath three feet of water near the shore of Gold Lake and they were unable to extricate themselves. Their bodies were found hanging over their canoe and partly immersed in the water.

The canoe had evidently been swamped, throwing its occupants into the water and, although they had succeeded in righting it, they were prevented from re-entering it by the unyielding mud gripping their feet.

Famous Horses for Canada

The best of Irish and Scotch hunters are being continually bought up by Canadians. The photo shows a recent batch shipped on the Canadian Pacific Ruer Metgama to Canada. The horse at the extreme right is the famous "Grand Fashion," a class prize winner in most of the principal shows in England and Scotland.

## Ontario Progressives And U. F. O. Groups Behind Prohibitive Principle

## French Riviera Is Experiencing Boom

**Huge Sums Made And Lost In Wild Scramble For Land**

Nice, French Riviera speculation never surpassed even in the hectic days of the Florida land boom, has struck the French Riviera. Hundreds of thousands of dollars are being lost and made in a wild scramble for land from Toulon to Mentone.

The English are in the majority among speculators but Frenchmen, Germans, Americans and Spaniards are all taking advantage of the unprecedented rise in land values.

Every kilometre on the Corniche road between Cannes and Monte Carlo is littered with huge posters advertising lots for sale. Jeanes Pins, a hamlet a year ago, has developed into a brilliant casino town practically overnight. In the fall of 1925, land around the few French cottages and the one inn could be bought for twenty francs per metre. It now brings 300 francs.

At Venise, Grasse and Saint Raphael, the same speculation is in progress.

## Named President Of Canadian Organization

**S. B. Gundy Elected Head of Dominion Board of Trade**

Saint John, N.B. S. B. Gundy, a past president of the Toronto Board of Trade, and credited with being one of the principal agents in calling together the Winnipeg economic conference out of which was born the Canadian Board of Trade, was chosen this morning to be first president of the Dominion organization. In proposing his name, A. O. Dawson, past president of the Montreal Board of Trade, paid a high tribute to Mr. Gundy's energy and capabilities.

Mr. Gundy, in accepting office, predicted the formation of the Canadian Board of Trade would open up new avenues of co-operation between the different boards throughout the Dominion.

Other officers elected, were: Vice-presidents, A. O. Dawson, Montreal; Capt. L. Doherty, Vancouver; J. H. Paulsen, Montreal; R. G. Perse, Winnipeg; L. W. Shinn, Saint John, chairman of the executive; William Hicks, Montreal.

## Dry Forces Active

**Will Oppose Candidates Who Support Ontario Liquor Policy**

Toronto.—"We are not antipathetic to the necessity of entering 'dry' candidates in any riding, but we will have to be guided entirely by local conditions as they become apparent," stated W. W. Peck, general secretary of the Ontario Prohibition Union, when asked whether the union would be putting candidates into the field at the coming provincial general elections.

Mr. Peck said that there would be a meeting at which committees would be set up energetically to oppose any candidate who supported the liquor policy of the Conservative Government.

## Fast Wireless Service Between Britain And Canada by Beam System

Montreal. — "It is a new glorie and paying tribute to the invention of put around the world for closer understanding between all men of goodwill." In these words Lord Burnham, chairman of the Imperial Press Union, greeted the inauguration today of the fastest wireless service in the world, the beam system between Montreal and London. Messages were exchanged at a rate of 200 words a minute and reception here was perfect. The inauguration messages were exchanged between representative journalists of the two British metropolises.

"In the course of years it seems the Atlantic will be entirely abolished and we shall be asking if the work of Columbus was really necessary," wirelessly the editor of the London Daily Telegraph, while other London News papers sent greetings in similar vein in reply to those from this side.

The first message was from Lord Atholstan, Montreal, to Lord Burnham, London, congratulating the latter in the completion of "this new link of Empire."

and paying tribute to the invention of put around the world for closer understanding between all men of goodwill." In these words Lord Burnham, chairman of the Imperial Press Union, greeted the inauguration today of the fastest wireless service in the world, the beam system between Montreal and London. Messages were exchanged at a rate of 200 words a minute and reception here was perfect. The inauguration messages were exchanged between representative journalists of the two British metropolises.

Toronto. — "The Progressive and U.F.O. groups stand squarely behind the prohibitive principle of the Ontario Temperance Act, as the best legislative method of combatting the drink evil—not contending that the Act is a perfect instrument, but that it ought to be improved and strengthened, as time and occasion may serve and public opinion will approve." In these words, W. E. Rancey, K.C., leader of the Progressive and United Farmer parties in the present provincial election campaign, summarized the policy of the groups under his leadership, in a manifesto tonight.

Mr. Rancey continued: "We stand as squarely against any system by which the Government would become the sales agent for the breweries and distilleries and by which the bar-room would be restored under another name, and the liquor interests would be back in politics as they were before 1916."

Mr. Rancey declared that Premier Ferguson had chosen to make the liquor question the major issue in the present election and he proposed to meet him on that ground. He set forth what he considered was Mr. Ferguson's "record on the temperance question" from 1914 to the present date and said that the premier's most serious "attacks on representative government and most effective assault on the Ontario Temperance Act were Mr. Ferguson's flagrant redistribution acts and his new policy of taking away the control of prohibitory legislation from the direct vote of the people, and the placing of it in the control of the Conservative party caucus."

## Germans Form Aluminum Trust

**No Mention Made of Including Britain or United States**

Paris.—Through the efforts of leaders of the German aluminum industry, another Continental trust has been formed, according to information reaching Paris business circles. A tentative agreement has been reached and France will probably be included before the cartel becomes operative.

The formation of this combination will be another coup for German business. Being a dominant factor in the aluminum trade anyway, Germany, instead of carrying on the fight for world markets single-handed, will have the financial and productive power of the cartel behind her.

Naturally, other members — probably Switzerland, Holland and Belgium — will benefit, but Germany will be the most fortunate one in the agreement.

No mention is made of Great Britain or the United States and it is presumed that these two nations do not figure in the projected trust, either directly or indirectly.

## Gives Cause For Earthquake

Berkeley, Cal. The seismic disturbances which jolted a comparatively limited area in Northern California, Oct. 22, apparently were caused by a submarine disturbance entering approximately 50 miles south west of here, air line measurement, apparently in or near Monterey Bay.

This is the decision of Dr. P. Berkeley, assistant seismologist observer of the University of California, Berkeley.

## Agricultural Research

Results Have Added Huge Sums to the Farming Income of the Country

The value of agricultural research carried out at agricultural colleges and experimental farms is seldom fully appreciated. The National Resources Intelligence Service of the Department of the Interior in Ottawa, the commercial value of Marquis wheat has been widely heralded and undoubtedly it has added millions of dollars annually to Canada's wealth and status as a wheat producing country, but it is one of the few instances that have been sufficiently spectacular to catch the public eye.

Agricultural research by both federal and provincial governments along lines of plant culture and animal breeding, and biological feeding and on have undoubtedly added millions of dollars to the farming income of this country, much of this work being done without recognition and without appreciation of its economic benefits.

An excellent example is furnished in a statement recently made by J. B. Reynolds, president of the Canada Agricultural Society, in particular reference to the work of the Field Experiments department of that institution. The one department, according to Mr. Reynolds, has been successful in producing, by selection and breeding, improved strains of oats, wheat and barley. These improved strains have been broadcast over the provinces and have enabled the farmer to increase the yield per acre in these grains. During the last eighteen years he has received an extra yield of wheat of over \$1,000,000, of barley an extra yield of over \$1,000,000, of oats an extra yield of over \$1,000,000.

### Colonel Took No Chances

Story of Miracle Did Not Sound Good To Him

Canadian newspapers tell how a miracle occurred in a court martial. During the American invasion of Upper Italy a Canadian soldier was supposed to have been shot in the back by a bullet from a machine gun. The soldier, however, was not killed. He was brought to trial. The court martial was held in a room where the soldier was supposed to have been shot. The court martial was held in a room where the soldier was supposed to have been shot. The court martial was held in a room where the soldier was supposed to have been shot.

The court martial was held in a room where the soldier was supposed to have been shot. The court martial was held in a room where the soldier was supposed to have been shot. The court martial was held in a room where the soldier was supposed to have been shot. The court martial was held in a room where the soldier was supposed to have been shot. The court martial was held in a room where the soldier was supposed to have been shot. The court martial was held in a room where the soldier was supposed to have been shot.

Woman Blacksmith to Austria  
Rosa Steinhauser, Blacksmith, is one of the best-known artisans in Eisenberg, Austria.

A diploma testifies that she is "thoroughly trained, having served her apprenticeship and satisfied her examiners that she is entitled to call herself a master blacksmith."

Rosa is a country girl as well as a blacksmith. She is a handsome woman, and she is the most satisfactory of all.

### A Rare Fruit

One of the rarest of fruits is the mango tree, which can be grown only where the temperature never drops below 35 degrees above zero. It is about the size of a mandarin orange, with a thick, woody rind. Queen Victoria, it is said, once offered a large reward for the first man who succeeded in planting a mango tree in England. The reward was never won.

### Are Great Pessimists

Two of the most conspicuous pessimists now living are Dean Inge and Sir Roderick Mowbray. The two British philosophers must be accounted greater than the English elegiacs, for, whereas Dean Inge sees only the doom of the British empire, Tagore predicts the downfall of all civilization.

W. N. P. 1932

## Manitoba Butter Scored High

Province Wins Over Forty-Four Per Cent of Prizes at Various Exhibitions

The dairy industry of Manitoba has made substantial progress during this year in both quality and production. The production of creamery butter shows an increase of 2,500,000 pounds over 1925 up to the end of August. Splendid reports have been received on the butter shipped to the British market, the buyers being entirely satisfied with the quality. Over 21,000 fifty-six pound boxes have been shipped direct to the British market since May 15th, a total of 1,109,600 pounds, valued at \$366,168.

The fifty-five creameries in operation in this province will manufacture this year about 16,000,000 pounds of creamery butter. In 1916 the output of creamery butter in Manitoba was 6,500,000 pounds and the production is increasing at the rate of about one million pounds per year. In 1925 Manitoba exported three hundred and fifteen carloads of creamery butter, valued at \$2,116,680. Most of this butter was shipped to the British market. At the Agricultural fairs in Brandon, Calgary, Edmonton, Regina, Vancouver, Victoria, New Westminster, Ottawa and the Canadian National Exhibition, Toronto, the Province of Manitoba won 44.8 per cent of all the first prizes, and 33.3 per cent of all the prizes awarded. There are fourteen cheese factories in operation in Manitoba this year, and the total make of cheese will amount to about one million pounds, an increase of about 250,000 over 1925.

## England Is Losing

Sixteenth Century Inn

Famous Swan Hotel at Birmingham Is to Be Demolished

England is soon to lose one of her most famous old inns, the Swan Hotel at Birmingham, whence rogues used to start for London in the sixteenth century and no woman is allowed except for exactly one-half hour, on one day yearly.

"The City of Birmingham has just bought the plot of ground where the inn stands and it will be demolished since it obstructs traffic. The Swan originally stood amid open fields. Demolition will occur in 1929, when the lease expires.

The inn still has a part of its old three coaching yard, whence stage coaches used to ply to London via Warwick and Aylesbury.

The most striking thing about the old place is a curious, centuries old, punishment to which no woman customer is allowed to drink or sleep within its walls. The rule is enforced despite the fact that the inn is run by a woman, on whose staff of waitresses are only women. On Christmas Day each year the rule against women is relaxed. Then men waiters may bring women in, but for only half an hour.

The dining room contains one long table on which a "President" always presides. Before taking his seat every guest is still required to observe the old custom of bowing to the man presiding and asking: "May I dine with you, Mr. President?"

## Are Good Travellers

Rats Will Go Long Distances to Obtain Food

How far will a rat travel to obtain food? An English experiment has shown that it will sometimes go 100 miles.

Scores of rats, now being caught in London are released daily, with indestructible tags attached to their legs. Within a week some of them have been caught fifty miles away from where they were released. One rat crossed half of England, but it took six months to do it. It was the longest migration so far traced.

Rat catchers say that there are more rats in London now than probably there have been in this century. Sixty million rats were last year destroyed by one rat-catching firm alone.

## Is Huge Financial Failure

Philadelphia's widely advertised pretensions Sesqui-centennial Exposition is a financial failure.

The exposition is to run until November 30, and to date, it is learned, has incurred a deficit approaching \$5,000,000.

The trouble, officials admit, is that less than 5,000,000 persons have come to the Sesqui, whereas, 25,000,000 were expected.

## Ban On Young Drivers

Women under age are forbidden to drive automobiles in Constantinople by order of the police. The ban is designed to reduce the number of accidents due to careless and fast driving. The order affects mostly foreign women, as Turkish women have not yet taken up the act.

Necessity knows no law and it's the same with extravagance.

And it sometimes happens that a man is married to his boss.

## Austrian Woman Has School For Birds

Teaches Nuthatches and Starlings to Talk and Sing

In Austria the starlings and nuthatches talk and sing, that is, all those who go to school to Mitzl Horrer. For years Fraulein Horrer has been teaching these two varieties of birds to talk and sing. And so successful has she been, that customers flock from all parts of Europe to visit her cottage, and to buy her birds.

She believes that the ability to sing and talk is strengthened through inheritance. Consequently she breeds her birds with the greatest care and has developed strains of nuthatches and starlings which are not equalled as singers and talkers in all Europe.

The starlings and nuthatches go to school each morning, not just in the morning but in the afternoon. The birds sit on her head, on her shoulders, in her lap and as she talks and sings to them, it spurs them on to imitative effort. And her method, Patience, an end less amount of it.

## When Writing Started

All Words Were Written With Capital Letters

"Caput" in Latin really means a head, and so a chief, and thus it comes about that we speak of "capital" letters to describe those that are used to mark the chief or most important words in a sentence.

When writing started, all the words were written in the same hand, and as far as our own alphabet was concerned, mostly in what we now call capital letters. Gradually, however, it was found that one could write more quickly by joining up the letters. Next it occurred to us to emphasize the beginnings of important words by writing them in the old manner, and so we got our "capitals."

## First Wheat Shipped From West

The first shipment of wheat from Western Canada was made just fifty years ago, comprising 857 bushels, for which a price of 85 cents per bushel was received. In 1876 the wheat acreage of "Western Canada" was 11,760 acres. It seems a far cry from that day to this with 21,741,788 acres of wheat, and just two hundred million bushels of "Wheat" wheat being sold last crop as from one bin!

The average individual consumption of milk in the United States last year was 1.2 pints a day.

## Peace Bridge Nears Completion

Built Where Britain and U.S. Fought Last Battle Along Niagara Frontier

Commemoration of one hundred years of peace between Great Britain and the United States will be celebrated at Buffalo, N.Y., and Fort Erie, Ontario, in the early summer of 1927 upon the completion and opening of the Vehicular Peace Bridge, now under construction across the Niagara River.

Ground was broken at Fort Erie, Ontario, for the construction of this bridge on August 17, 1925, and construction has progressed at a high rate of speed in order that the structure might be opened for travel by the spring of 1927.

On the Canadian side, its terminal will be on the ground over which was fought the battle of Fort Erie, the last conflict waged between England and the United States along the Niagara frontier, in the War of 1812. On the American side, the terminal will be on the land once occupied by the buildings of Fort Porter in Buffalo. The City of Buffalo has within the past year purchased the Fort Porter property from the Federal Government, and resold a portion of it to the Buffalo and Fort Erie Public Bridge Company for terminal grounds. The army post, after occupying these premises for upward of a century, was abandoned this summer.

The Peace Bridge will be the only vehicular bridge between Niagara Falls and Duluth. In fact, from Duluth to the Gulf of St. Lawrence, a distance of 2,000 miles, there are but four vehicular bridges crossing the waters of the Great Lakes system. Two of these bridges are at Niagara Falls, one is at Lewiston, N.Y., and the other at Montreal, Quebec. All of these are toll bridges, owned by companies or corporations. Each is, and rightly so, in the nature of a commercial enterprise and so differs materially from the Peace Bridge.

## Egg and Poultry Pool

The recently organized egg and poultry pool in Saskatchewan has 17,000 members. Egg production in the province is 33,672,263 dozen yearly. Saskatchewan is now the second largest poultry producing province in Canada, Ontario being first.

A cable ship has discovered that the bed of the Atlantic Ocean near St. Helena has risen two miles in the past twenty-five years.

## Ultra Violet Rays Produce Vitamines

Ceratin Foods Exposed to Sun Are Greatly Improved

Sun rays as the housewife's friend, especially in the kitchen, is a new representation of medical science to the everyday world.

"The housewife who would have her home free from the dangerous forms of germ life should let the sun in through the open window," said Dr. William Beulah Snow of New York, at a conference on ultra-violet rays. "Ultra-violet rays do not penetrate glass, and they are the beneficent rays that destroy bacteria."

Certain foods may be exposed to the sun with profit of another sort, Dr. Snow added.

"Various foods exposed to ultra-violet rays are rendered vitamins active, possessing effects which otherwise would not be present," he said.

Flour, milk and some other foods that are subjected for periods to ultra-violet rays or to the sun's rays, receive derived properties from the radiations which cause them to become more active in the processes of body building.

Other properties of these powerful invisible light rays Dr. Snow summarized as follows: they penetrate running water and rid it of bacterial life that might cause infection; they act upon the lime salts in circulation in the blood so that it can be used in bone-building, and in this way they are the specific cure for rickets.

## Should Advertise Dominions

Imperial Conference Would Do Well to Consider Idea

It would seem that one thing to which the imperial conference might well give serious thought is a plan for advertising Canada and other dominions so that England with her army of unemployed, could know of the opportunities in the dominions. It has been estimated that England's bill for sales since the war totals \$1,500,000,000. How much of that is a result of the ignorance as regards Canada for which Sir James has been blushing? Canada's present wheat champion, James Golden Mitchell of Dalhousie, Saskatchewan, arrived in Canada from England 21 years ago, and it is worth noting that he was an emigrant without capital. —Buffalo-Courier Express.

"She's seen 20 winters."

"Oh, she's 49 at least."

"Yes, but they go south every fall."

## Garnet Wheat

Government to Issue Blue Book on This New Variety

Two thousand farmers grew Garnet wheat in 1925.

Up to date nearly 300 reports have been received, and all of them confirm the advance reports made about this grain.

Each farmer who received Garnet wheat has been asked to fill in a form showing his yield per acre as compared with his main crop, whether his crop of Garnet and other grains was damaged by rust, the period required for maturity and many other facts. When all these reports are in, the department of agriculture will issue a blue book giving the statistics on Garnet.

Meantime the reports indicate that Garnet has maintained the advance notices as to yield and maturity. It has consistently beaten Marquis by from seven to ten days.

## Regular Bluebeard Castle

Well Known Antiquary Discovers Building in Kent, England

Dr. Charles H. Beard, a well-known antiquary, has discovered a sixteenth century Tudor castle in Sissinghurst, Kent, England, complete with moat, secret chamber, murder story, and ghost legend of an English Bluebeard. The castle was built in 1550 by Sir John Baker, a Chancellor under Henry VIII., who was responsible for the burning of a number of heretics during the reign of Queen Mary.

"Sir John," says Dr. Beard, "may be called an English Bluebeard, for there is a definite tradition that he was in the habit of inviting women to visit him and then murdering them for their jewelry. He kept the bodies of his victims in a secret chamber beneath the main staircase, and his ghost is supposed to haunt that room to this day." Dr. Beard intends to renovate the castle, and probably will live in it when the work is completed.

## Foresight Of Canadian Farmers

American Newspaper Comments on Co-operative Organization in Western Canada

Within three years the farmers of Western Canada have established the largest farmers' co-operative organization in the world. This organization includes a Canadian wheat pool in Manitoba, Saskatchewan and Alberta, with a membership of 125,000 farmers controlling more than 13,000,000 acres sown to wheat. The Canadian farmers' organization controls the greater part of Canada's wheat production and Canada exports more wheat than any other country in the world. What keeps Americans from organizing to the same extent and with the same efficiency? Is it jealousy of individual leaders, too much politics, control of crops by speculators? What keeps the prices paid American farmers so uncertain? Other prices are regulated controlled—gasoline, sugar, freight, etc.—Sensile Post-Intelligencer.

## Hard To Put Into Words

Rather Difficult to Describe What Constitutes a Gentleman

Birth and breeding may count for much, but they cannot always be trusted to produce gentlemen, according to modern ideas. There seems to be no room for doubt that in the past at least "gentle" breeding was not a sufficient safeguard against either blackguardism or rascality.

We have all our notions of what constitutes a gentleman, but it is when we attempt to reduce our ideas to words that the trouble begins. —Woodstock Sentinel-Review.

## Saskatchewan Pool Elevators

More than 20,000,000 bushels of wheat have been handled by the Saskatchewan pool elevators in date despite unfavorable weather conditions. The pool elevators broke their own records recently when they unloaded 605 carloads, or the equivalent of 850,000 bushels of wheat in a day. The Saskatchewan wheat pool now has 575 country elevators in operation and six under construction.

## To Develop Canadian Mines

A suggestion to transfer 150,000 of Britain's idle miners to the mineral areas of British Columbia and Northern Ontario was made by the Right Rev. A. F. Winnington-Ingram, Lord Bishop of London, in an address before the men's and women's Canadian Clubs of Winnipeg. He saw enormous possibilities in such increased exploitation of Canada's minerals.

Doctor—"Take one of these reducing pills just before each meal and one directly after."

Miss Henrywaite—"That will make them about two hours apart, doctor."

Optimist—"When is the best time to marry?"

Pessimist—"If you are young, not yet; if you are old, never."

1.—Crayon sketch of Viscount Willingdon drawn on board Empress of Scotland, just prior to the vessel sailing for Canada.  
2.—Crayon sketch of Viscountess Willingdon drawn on board the Canadian Pacific liner Empress of Scotland just prior to the vessel's departure for Canada.  
3.—Misty (inset) Laird Terrier, belonging to Their Excellencies which gained instant popularity.  
4.—Menu card designed for use on Empress of Scotland when she carried the Governor-General to Canada, showing on a map of the world the various positions held all over by the Empress by Viscount Willingdon.  
5.—Canadian Pacific Flagship Empress of Scotland which carried Their Excellencies to Canada.

Their Excellencies Viscount and Viscountess Willingdon made many friends on their voyage from England to Quebec on board the Canadian Pacific Flagship Empress of Scotland, when His Lordship came here in October to become Governor-General of the Dominion. They paid visits to all parts of the vessel chatting with new settlers for Canada and presiding at the various functions that take place aboard ship during an ocean voyage. Sharing their popularity was their Cairn Terrier, Misty, who was friends with everyone except perhaps a plump Chow who looked to him as though he might develop a dangerous rival.

Canada's thirteenth Governor-General

al had a fine reception when the ship docked at Quebec. He struck a tactful note when he told his French-Canadian audience he too could claim descent from the Normans and that French blood flowed in his veins equally as in theirs. "In this country," he said, "the descendants of our two races have worked for many years under the British Crown for a common purpose and object, namely, to promote the welfare and prosperity of the people of this wonderful country."

First impressions are vital in establishing successful relations and perhaps no impression gave so cordial an effect as one of His Lordship's speeches aboard the Empress of Scot-

land, which was broadcast all over Canada. In it he said: "I wonder if I may venture to add one word of rather an intimate and personal character. It is this—in wishing all my fellow-passengers the best of good luck in the future and all health and happiness they can possibly expect and obtain, may I ask them one and all to have occasional thought—a kindly thought—to one who is about to undertake very grave responsibilities for the British Empire in the great Dominion of Canada."

That is the true democratic note, sounded with modesty and feeling and sure of an unreserved response throughout the length and breadth of Canada.

Cardston municipality, was ad-  
journed until December 13. Ac-  
cused when arraigned before Mr.  
Justice Ives at the opening of the  
criminal sittings of the Supreme  
court on Monday morning pleaded  
not guilty and elected for trial by  
jury.

More school fairs will be held in  
Alberta next year, it was announ-  
ced at a conference of government  
officials, fair directors, and agri-  
cultural school principals, which  
was held in the parliament build-  
ings, Thursday. The plan is to be  
developed and enlarged consider-  
ably, and it is expected that 140  
events will be on the list for 1927,  
an increase of 15 over the present  
number. Great success has mark-  
ed the school fairs this year, it was  
reported, notwithstanding the fact  
that bad weather kept down the  
attendance somewhat.

T. Christensen now drives a new  
Star six sedan, purchased last Tues-  
day.

on a map of the world the various positions held all over by the Empire by Viscount Willingdon.  
5.—Canadian Pacific Flagship Empress of Scotland which carried Their Excellencies to Canada.

Their Excellencies Viscount and Viscountess Willingdon  
made many friends on their voyage from England to  
Quebec on board the Canadian Pacific flagship Empress of  
Scotland, when His Lordship came here in October to become  
Governor-General of the Dominion. They paid visits to all  
parts of the vessel chatting with new settlers for Canada and  
presiding at the various functions that take place aboard ship  
during an ocean voyage. Sharing their popularity was their  
Cairn Terrier, Misty, who was friends with everyone except  
perhaps a bluejay who looked to him as though he might  
develop into a dangerous rival.  
Canada's thirteenth Governor-General had a fine reception  
when the ship docked at Quebec. He struck a tactful note  
when he told his French-Canadian audience he too could  
claim descent from the Normans and that French blood flowed  
in his veins equally as in theirs. "In this country," he said,  
"the descendants of our two races have worked for many  
years under the British Crown for a common purpose and

object, namely, to promote the welfare and prosperity of the  
people of this wonderful country."

First impressions are vital in establishing successful rela-  
tions and perhaps no impression gave so cordial an effect as  
one of His Lordship's speeches aboard the Empress of Scot-  
land, which was broadcast all over Canada. In it he said:  
"I wonder if I may venture to add one word of, rather an  
intimate and personal character. It is this—in wishing all  
my fellow-passengers the best of good luck in the future and  
all health and happiness they can possibly expect and obtain,  
may I ask them one and all to give an occasional thought—  
a kindly thought—to one who is about to undertake very  
grave responsibilities for the British Empire in the great  
Dominion of Canada."

That is the true democratic note, sounded with modesty  
and feeling and sure of an unreserved response throughout the  
length and breadth of Canada.
